

Mogaji Favour Oluwabukola

Electronics & Computer Engineering student | favourmogaji3@gmail.com | +2347032034830

PROFESSIONAL PROFILE

A focused Electronics and computer Engineering undergraduate with a strong interest in telecommunications systems and network operations. Possesses hands-on laboratory experience in circuit analysis, signal handling and basic networking operations, with a strong willingness to learn and adapt on a fast-paced engineering environment.

EDUCATION

LAGOS STATE UNIVERSITY

Bachelor's of science in Electronics and Computer Engineering

LAGOS, NIGERIA

Expected graduation, sept, 2027

- **Concentration:** Embedded Systems and IOT, Communications and signal processing
- **Related coursework:** Circuit Analysis and Electronic Devices, Analog and digital Electronics, computer Architecture, Power Electronics, hardware and software integration

Experience

Undergraduate Electronics and Computer Engineering Projects

Lagos state university

2023- present

- Designed and implemented digital and analog circuits for practical lab projects, including a micro-controller based traffic light systems
- Developed embedded system applications using Arduino and raspberry Pi, Integrating sensors and actuator for automated control
- Built and tested computer architecture and digital logic design, improving efficiency and understanding of hardware software interaction
- Collaborated in a team to complete a senior project, demonstrating problem solving, debugging and project management skills
- Implemented small scale algorithms to optimize system performance in embedded projects

ACTIVITIES AND LEADERSHIP

- Team Lead, Electronics Club – Led a team of 5 in designing and building microcontroller-based projects for university tech exhibitions.
- Member, Robotics & Automation Society – Participated in workshops and competitions, including line-following and obstacle-avoiding robots.
- Event Coordinator, Tech Talks Series – Organized seminars and guest lectures on emerging technologies for students.
- Volunteer, University STEM Outreach Program – Mentored secondary school students in basic electronics and programming concepts.
- Hackathon Participant – Developed IoT and embedded system solutions in team-based competitions

Skills

- Programming & Software Skills: C, C++, Python, JavaScript, HTML/CSS, React.js, Node.js, MATLAB, Hardware-Software Integration
- Tools & Platforms: Git/GitHub, Proteus, Pspice, MATLAB, VS Code, Arduino IDE
- Soft Skills: Team Collaboration, Problem-Solving, Project Management, Communication, Leadership
